

Next-generation EHR for home health, hospice, pediatric and private duty agencies

myUnity

Netsmart myUnity® for home health features the forms your nurses and therapists are already familiar with, so there's no learning curve.

Add our suite of easy-to-use and easy-to-access clinical tools, physician order management and compliance tools, and you have a powerful solution that will enable your entire organization to deliver better care.

Easy to use

Our ease of use is legendary. By building straightforward processes into every function, we ensure your clinicians can focus on care, not computers.

In the cloud

All of your locations and service lines on a single site, accessible from anywhere on any device with a secure Internet connection.

Access to tools

The entire care team, including the patient and family, can securely access tools and managed portals.

Clinical features

- Intuitive workflow that makes it easy to chart
- Smart communication tools that enhance care coordination
- Medication management tools with Medi-Span
- Auto generated 485 form
- IDG Care Plan updated in real time

Flexible forms

- Flexibility of forms
- Briggs
- Med-Pass
- Netsmart suite of forms
- Agency-specific forms

Agency and billing features

- Integrated electronic fax
- Scanning and attaching electronic documents or photos
- Audit trails
- Streamlined billing process and able to bill commercial insurance, Medicare, Medicaid, VA and private pay inside one system

Grow

- Unlimited users
- Unlimited training for office and field staff
- Easy to implement with rapid deployment
- New program roll-outs with unique forms within weeks, not months

Security

- HIPAA Compliance
- HITRUST CSF Certification
- User role-based security
- Amazon Web Services that offer the choice of NASA, FDC, CDC and other leading providers that put security first

Integration

- SHP
- PPS Plus
- Home Health Gold
- Playmaker CRM
- And many others!

I love how easy it is to use. We can train any new hire in only a few hours and get them interacting with patients instead of charting.
